

Information about MWI Pet

21/05/2025 1:10 pm BST

MWI Pet is a website application designed by MWI Animal Health. This web app allows you to connect your practice with a digital pet-parent solution that fully integrates with Merlin. This can help reduce calls into practice, increase efficiency and improve communication.

MWI Pet is a white label product, meaning the branding is specific to your practice. Practice clients can book an appointment and request a repeat prescription, even when the practice is closed.

Practices can embed their unique MWI Pet URL into their website, so clients can book an appointment or request a prescription seamlessly.

MWI Animal Health can provide the practice with a customised poster containing a QR code so clients can scan and access MWI Pet.

If you are interested in MWI Pet, please contact your Regional Customer Manager (RCM) for more information.
