

Stock Variance

16/07/2025 4:35 pm BST

Summary

This screen can be used to assist with counting stock in Practice. Users can enter the value of the most recent stock take/count into Merlin, the Stock Variance report will then show any differences.

Using the Stock Variance Tool

1. Navigate to Inventory via the Primary Navigation on the left-hand side and select 'Stock Control'. Ensure the 'Stock Variance' tab is selected.
2. Ensure you have selected the correct Supplier from the drop-down list (this will default to your main supplier).
3. Select a treatment type from the left-hand menu, or use the 'Description' box.
4. Stock is displayed. This can be filtered using the fields provided.

The screenshot shows the 'Stock Control' window with the 'Stock Variance' tab selected. The 'Supplier' is set to 'Centaur'. The 'Description' field contains 'advocate'. The 'Site' is 'Esher' and the 'Stock Centre' is 'Esher'. The 'Run' button is highlighted with a red box. The table below shows the stock levels for various items.
