

Re-initiate Reminders

31/07/2025 3:47 pm BST

Summary

Re-Initiate Reminders is a utility used to maintain Codes with Reminders assigned. This tool ensures that all reminder types are overriding the correct reminder types.

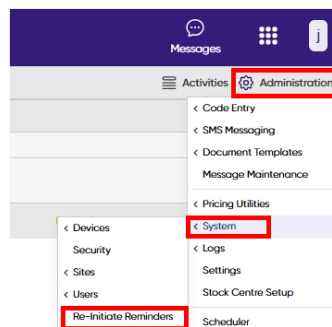

For information on Reminder Types, see: [Reminder Libraries](#)

Details

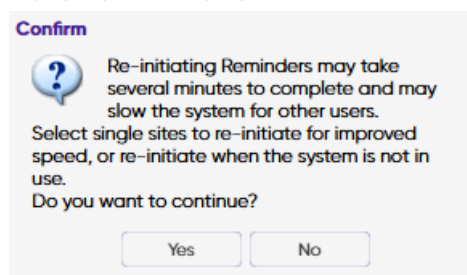

Note: This change is non reversible and we recommend contacting MWI Support prior to running if unsure.

Re-initiating Reminders

1. Navigate to Administration > System > Re-initiate Reminders.
