

Adding Patient Weights

01/08/2025 1:36 pm BST

Summary

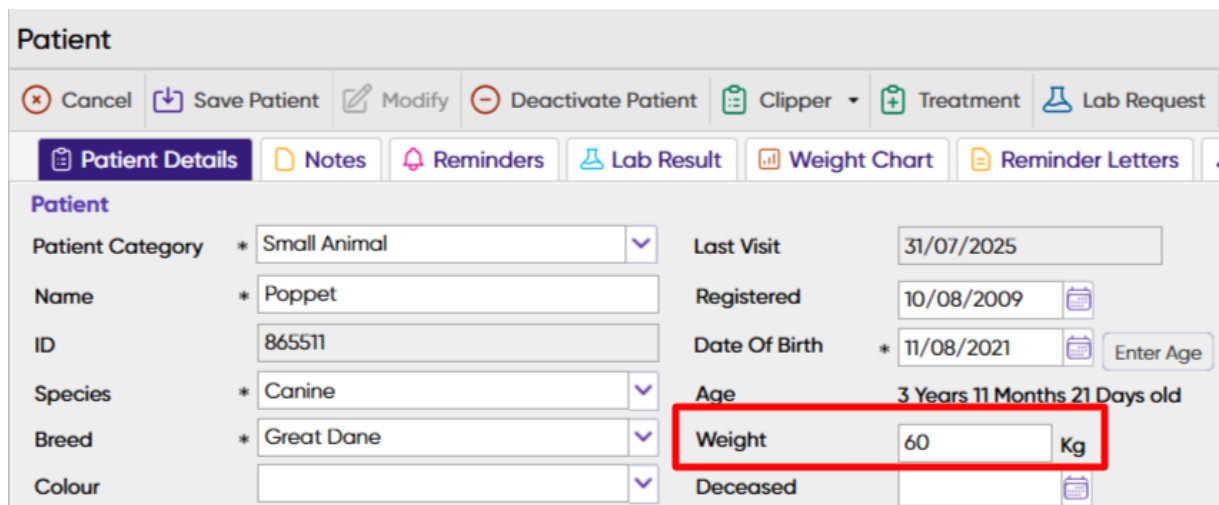

A patient's weight can be added through the Patient Details screen, from any of the Day Lists, from the Treatment screen or the Reception screen. This functionality allows you to add a patient's weight to their treatment history with the ability to view their weight progress.

Details

Add Weight

From Patient Details

1. Search and select a patient from Reception
2. Select the patient and choose 'Details'.
3. Select 'Modify'.
4. Insert the patient's weight into the Weight field.
5. Select 'Save Patient' to save changes.

The screenshot shows the 'Patient Details' form in a software application. The form is titled 'Patient' and has a toolbar with buttons: Cancel, Save Patient, Modify, Deactivate Patient, Clipper, Treatment, and Lab Request. Below the toolbar are tabs: Patient Details (selected), Notes, Reminders, Lab Result, Weight Chart, and Reminder Letters. The form fields are organized into two columns. The left column contains: Patient Category (Small Animal), Name (Poppet), ID (865511), Species (Canine), Breed (Great Dane), and Colour. The right column contains: Last Visit (31/07/2025), Registered (10/08/2009), Date Of Birth (11/08/2021), Age (3 Years 11 Months 21 Days old), Weight (60 Kg), and Deceased. The 'Weight' field, which includes a numeric input and a unit dropdown set to 'Kg', is highlighted with a red rectangle.

6. Once you have saved the patient's weight, an entry is added to the patient's Treatment History.

Date: 01/08/2025			
	01/08/2025	13:27	Weight updated from 63.300 Kg to 60.000 Kg

From Day List

1. Select a patient from a Day List on the Primary Navigation on the left-hand side.
2. Select the 'Add Weight' button, or if there isn't one visible, right click on the patient and select 'Add Weight' from the list.

The screenshot shows the 'Full List' interface with a table of appointments. The 'Add Weight' button is highlighted in a red box. A context menu is open over the 'Add Weight' button, listing various actions like 'Set Arrived', 'Set Failed to Show', 'Set Cancelled', 'Set Treated', 'Set not in-treatment', 'Set As Emergency', 'Set Priority', 'Set Paid', 'Appointment Memo', 'Edit Appointment', 'Delete Appointment', 'Print Appointment Label', 'View Appointment Trail', 'Send To Kennel', 'Send To VetCheck', 'Arrive and Send To VetCheck', 'Clipper', and 'Add Weight'.

3. Insert the patient's weight and select the Surgeon click 'Add'.

The 'Add Weight' dialog box is shown. It has a 'Weight (Kg)' field with the value '61', a 'Surgeon' dropdown menu with 'Jamie Smith' selected, and an 'Add' button.

4. Once added, the weight will show in Treatment History.

From Treatment Screen

1. Enter a patient's Treatment Screen.
2. Select 'Weight' and select 'Add Weight' from the drop-down menu.

The screenshot shows the 'Treatment' interface. The 'Weight' dropdown menu is open, showing 'Add Weight' as the selected option.

3. Insert the patient's weight, select the Surgeon and select 'Add'.

The 'Add Weight' dialog box is shown. It has a 'Weight (Kg)' field, a 'Surgeon' dropdown menu with 'Jamie Smith' selected, and an 'Add' button.

4. Once added, the weight will show in Treatment History.

View a Patient's Weight chart

1. Enter a patient's Treatment screen.
2. Select 'Weight' and select 'Weight Chart' from the drop-down menu.
3. The patient's Weight Chart will display. The patient's weight history is displayed on the left-hand column.
4. You can view the chart in either Line Chart or Condensed.
